 - i. Finish the manicure with a top coat from Victoria Vynn (any Victoria Vynn top coat is compatible with GEL POLISH colors from the Luna Glass collection).

Product Specification Sheet

USING LUNA GLASS COLLECTION POLISHES IN NAIL ART

- Glass Nails (Glass Effect Design): You can achieve the glass effect by using a transparent polish with a delicate pigment.
- Glass French Manicure: Apply a chosen opaque color to a nail covered with a full coverage color and paint the French tip as requested.
- Stained Glass Nail Art: Luna Glass polishes are excellent for creating stained glass mosaics on nails.
- Cat Eye Effect: Using color 408 Moonlight and a magnet, you can arrange the magnetic particles on your nails in many ways.
- Cat Eye with Glass Effect: Color 408 Moonlight works great as a base for transparent colors, creating a unique manicure
- Layered Nail Art: Color 408 Moonlight works great as a base for transparent colors, creating a unique manicure.
- Fantasy French: You can build color intensity by adding more layers. By creating designs between layers of transparent colors, you will achieve a three-dimensional effect.
- Colored Ombre: Luna Glass transparent colors are excellent for creating a fantasy French (remember, this is not a nail building product).
- Colored Crystal Effect: Thanks to the transparency of Luna Glass colors, you can easily achieve the effect of colored stones on your nails. Apply white hybrid polish to the wet transparent polish and wait for the colors to blend gently.
